SENS SKETCH PEN

0.03mm-thin black felt needle that can be used to sketch patterns for gel polish painting, or to complement and make the nail design stand out and unique. If you find it difficult to draw with gel, the felt needle offers you a “stress-free” solution, as it is always easier to draw lines rather than paint. This makes creating the design enjoyable and fun. The felt needle will give you even lines thickness when you draw, so the lines will be spotless and evenly overlapping. Use a shiny top coat eg. Cool Top, cure then buff the surface with a 180 buffer to take off the shine, cleanse, use the pen to create your design, then apply a shiny top coat. It is not recommended to use a matte gel top coat straight after using the pen so it avoids dragging the pen design because of the consistency of the matte top coat. Applying a lighter, shiny top coat first, then a matte top coat would work best if you would like a matte effect at the end. We recommend SENS Top Gel to cover it.

SENS NAIL ART PEN

Nail art needle pen for sharp lines and unique designs

This product is 0.03mm thin, black nail art needle pen which can help you prepare the patterns you want to draw on the nail as a decoration; or it can make the already decorated nail surface more unique. This product is a big help for anyone who has difficulties drawing with gel polish, working with this could make the decoration process stress-free because drawing is always easier than painting. This pen provides you the possibility of the constant line, so it would be gap free and the line wouldn't break at any point. This product can make the whole decoration process fun and joyful. Recommended usage: On the top of the fully cured top gel, matte the surface with a #180 file. We don't recommend to use this after a Matte Top Gel, but if you insist to use it anyway, the best you can do is work with a very fine movement and a massive material usage.

ACRYL PAINT RETARDER LIQUID

This colorless liquid can be mixed with a relatively fast-drying acryl paint to slow down the drying process. Drip it on the palette to your ink - the more you drip, the slower it will dry. The liquid makes the texture of the paint soft and creamy, so the edges of the flower petal will not be fibrous. A huge help in the heat!
